

SCG / Grid Facility Department Meeting

Oct 2010

Overview

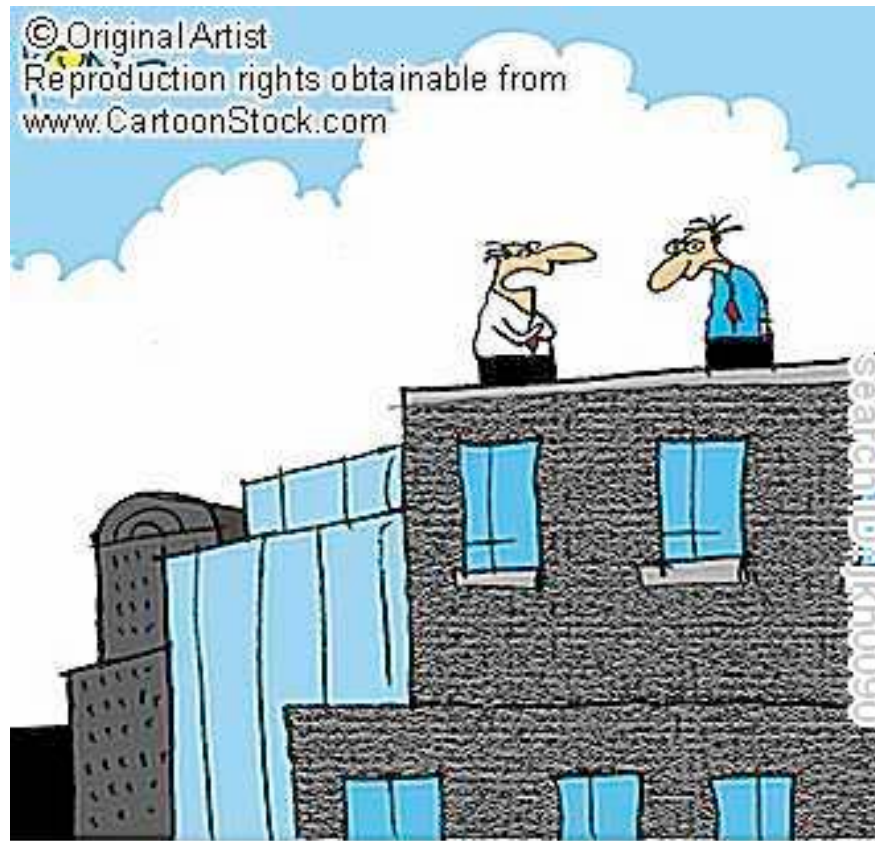

- On Office Moves... (?)
- Safety
- Office Moves
- Computer Security Awareness Day
- Fermi Cloud
- Other Dept. Issues

Nov 3, 2010

Gabriele Garzoglio

Computing Division, Fermilab

On Office Moves... (?)

"You said you wanted to start off at the top, well, I agree. I'm having your desk moved up here as we speak."

Safety: follow up with tickets...

- INC #27512 – Snow piles hinder the street view on the NW corner of the horseshoe
 - Groundskeeper: we will accumulate the snow on that corner during a storm to clear the parking lot; however, we will reduce the height of the pile during the day or the day after.
- INC #23924 – Horseshoe Illumination
 - The lighting [under the stairs] was removed due to the inability to properly maintain the system due to environmental conditions. FESS has determined the lighting adequate without the step lighting.

Office Moves

- CD is preparing to reorganize office space to accommodate for the increased size of the division after the merge with BSS and Computer Support personnel from TD.
- The goal is to co-locate groups
- About 100 people will be moving
 - *So far*, from the Grid Dept., Doug, Marko, Parag, and Ted have been asked to move
- The plan is to use professional movers to minimize disruption in your work schedule

Computer Security Awareness Day

- Several training classes and security-related talks on Nov 9, 2010
- <http://cd-docdb.fnal.gov/cgi-bin/DisplayMeeting?conferenceid=513>
- Plan to attend selected topics, especially if your training is about to expire in the next quarter:
<https://www-esh.fnal.gov/pls/cert/itp.html>

FermiCloud

- Status report from Steve

Other Dept. Issues

- FY11 FTL Activities have just been loaded into the system. Check out for possible changes to your usual list.
- KISTI has agreed to send a Computer Scientist at Fermilab to work 6 months on one of our projects.
- Nov dept. lunch volunteer is Dan (from last Dept. meeting)
